

IMAGING SOLUTIONS With IntraVet!

IntraVet is pleased to now offer an integrated imaging solution that works with your modalities. With this module, you can send and receive data from your radiography and ultrasonography equipment.

Integrated imaging capabilities:

- DICOM conformant solution
- Compatible with modalities that support DICOM MWL standard
- Full MWL functionality
- Pre-populates modalities with client/patient data from within IntraVet, avoiding mistakes
- DICOM Query/Retrieve functionality allows viewing study within IntraVet

Please ask your IntraVet sales representative for more information!
